The diagram consists of a large rectangle with a smaller rectangle inside it. The smaller rectangle is positioned in the upper right corner of the larger rectangle. A horizontal line segment extends from the right side of the smaller rectangle, passing through a vertical line that divides the space into two columns. Below this, there is a grid of vertical lines. The grid is composed of five vertical lines, creating four columns. The first column is the widest, followed by three narrower columns of equal width. The grid is bounded by two horizontal lines, one at the top and one at the bottom. The entire diagram is rendered in a light blue color.
